Change Hero and hero content:

- Under pages, select All pages -> SOS-DOGS.
- Upload your hero, the image size is based on the themes settings.
- Enter the title and the subtitle you want inside the hero. The hero is inside. The hero is a H1 tag and can be styled the same way thru CSS, the same goes for the subtitle that is a H2 tag.

Change number of dog cards shown on the front page:

- Open up settings thru the COG icon in the admin panel.
- There is an option named: Theme settings: "Dogs Shown on front-page".
- Select the number of posts you want to show and save, the number of posts shown on the front page will be based on that specific number.
- If no number is given it will show all the dogs in the archive.

Add a taxonomy for the dog:

- Click on the options for dog and the taxonomies size, location and adopted will be shown.
- Inside a category you can add your own options for example if you want to add the size: 2XL, you can do just that. These categories that you create will automatically be available as options to your main menu.
- Open up the page and choose widgets -> menus, from there you can place your newly added term to the taxonomy by putting it under the taxonomy with the drag and drop function.

Add a dog:

- In the admin panel there is an option named dogs, select that option.
- A create post page will be shown, from here you can set the title and an image for the post thru the editor.
- Don't forget to enter the data for the dog (which size he belongs to, where to find him, how tall he or she is and what the weight is.
- You can also place the dog as adopted and set the current date to when the dog was or will be adopted.
- when the dog is adopted set the adopted options to adopted, a watermark with the text "ADOPTED" will then be placed on top of the dogs image in archive pages. And the dog will also be categorized as adopted.

Create/edit information items that shows instructions on the front page:

- Click the "information items"
- You can there add or edit the information items that are shown on the front page. If you are on a tablett or phone device, these will be shown as accordions instead of "cards".

Add/edit the contact form:

- Download the plugin named WP-forms Lite from the plugins section in the admin panel.
- You can from that create your own contact form if the one the theme provides you doesn't satisfy your need.

Add/edit the success stories:

- Choose the *success stories* option from the admin panel.
- You can there add new or edit success stories that are shown on the front page.
- To add stars you can drag the option rating to the rating that the customer thinks you deserve, these will be shown beneath the content of the success story.
